

The **video** below is 'eye-roll American' but other than that, it's clear :  
<https://youtu.be/r51YroAFPds>

#### NEEDED :

- **cotton** T-shirt, not too narrow (!)
- pair of good scissors

#### Not in the video:

- as recommended everywhere, I add a double layer of **towel paper** or baking paper in between.
- after each use soak mask in **boiling water with plenty of detergent**, and throw away towel/baking paper, obviously.

The fabric shrink a little when washing, so take that into account when cutting.  
 Below my sketches of the different steps and my first creation ;))  
 Sort of enjoy ! Trui

 #iprotectyouandyouprotectme #masks4all

Mask making WITHOUT sewing, just cutting, in 10 minutes (less for the quick ones) and even looks good.  
 BEST model I came across and tested ;))
